Screen 90° with shelf

RFID lock system

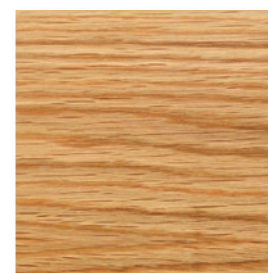

Electrical outlet and USB charger

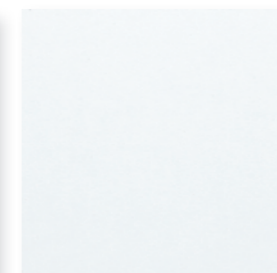

Up & down button

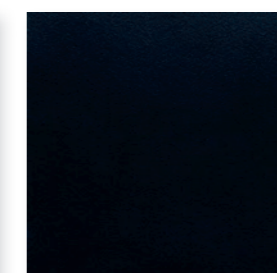

Easy storage with charging facilities

Oak

White laminate

Black nano laminate

White metal

Black metal

Workplaces and the way people work evolve constantly. Designers, Architects and Companies have to face new creative challenges as people are more and more focused on the living quality of the office through correct space planning, choice of materials, colours and careful design of furniture.

Height adjustable tables add a solid contribution to the creation of an healthy and dynamic working environment.

Conceptually, we have decided to approach the table as two separate projects: the lower part, below the top (Hardware) and the higher part, over the top (Software). The Hardware supports the daily activities with a solid steel structure and a silent electrical mechanism, the Software is where home and work blend with a warm Scandinavian feel, through the use of carefully chosen textiles, woods, colours and accessories, smart storage and charging facilities.

### **Evoluzione is designed by Metrica**

Metrica, under the leadership of Lucio Quinzio Leonelli and Robin Rizzini, places design in a new value context resulting in an internationally recognized global vision in creating and managing projects.
