

# Sansa frontskärmar / front screens

Design Kjell Hammar

## Produktinformation

Sansa-seriens frontskärmar finns i fem olika storlekar. Alla har ett gemensamt mål – att dämpa den allmänna ljudnivån och skärma av.

## Teknisk information

För att dämpa både låg- & högfrekventa ljud tillverkas Sansa-seriens frontskärmar av en hård kärna i MDF och mjuka ljudabsorbenter. Sedan kläs hela skärmen i valfritt tyg. Frontskärmarna fästs med vinkelbeslag på bordsskivan.

## Product information

Snitsa front screens are available in five various sizes. All screens have a common goal – noise reduction and divide areas.

## Technical information

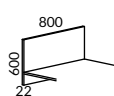

To reduce both low and high frequency sounds, Sansa front screens are produced of a hard MDF and soft sound absorbers. The entire screen is upholstered in any fabric of your choice. Front screens are secured with brackets to table tops.
